

SecureAcademy™ F.A.Q.

What is the *SecureAcademy™* program?

SecureAcademy™ is Check Point MIND's cyber education program, which provides up-to-date, cutting-edge cyber educational content through partnerships with secondary schools, technical institutions, vocational schools, universities, colleges, government departments, and non-profit organizations. Through *SecureAcademy™*, Check Point is able to provide free training and industry-recognized certifications to the world's next generation of cybersecurity professionals in our mission to minimize the global gap within the cybersecurity workforce, and create a future employee pipeline to entry level roles in Check Point or any of our respective partners.

Who can join *SecureAcademy™*?

SecureAcademy™ is open to any higher learning institution worldwide with accredited degrees, diplomas, certificates, or continuing education programs.

Who teaches the *SecureAcademy™* curriculum?

Check Point's technical team trains and mentors our *SecureAcademy™* partners' designated instructors over a 4 or 3-day online training course. After the training is completed, the instructors go on to teach their students at their respective institutions towards taking Check Point's official certification exams.

What do *SecureAcademy™* students learn?

We offer on demand online cyber education content, as well as in-person certification led track on the cyber topics such as Networking Security, Cloud Security, Security Automation, Cloud Security and Cyber Security essentials and more. You can find all the information on the *SecureAcademy™* website under training and certifications. Currently, *SecureAcademy™* offers its partners the following certifications:

- **Check Point Certified Security Administrator (CCSA)**
- **Check Point Certified Security Expert (CCSE)**
- **Check Point Certified Automation Specialist (CCAS)**
- **Check Point Certified Cloud Specialist (CCCS)**

How much does the *SecureAcademy*™ program cost?

The program is free to join. Program instructors receive free training and 100% discount vouchers for their certification exams. Students of *SecureAcademy*™ partners receive free training and 85% discount vouchers to take their certification exams at our online proctor exam provider.

How do we join the program?

You can submit your institution's application to become a Check Point MIND's *SecureAcademy*™ partner by clicking "[Partner With Us](#)" on the *SecureAcademy*™ website.

What are the eligibility requirements for a course completion certificate?

As we do not issue certificates of completion, we encourage all students and instructors to take their official certification exams at our proctor exam provider to become officially Check Point certified.

Would my institution be authorized to hold the exams for students?

SecureAcademy™ partners can hold their respective exams, but students will not be officially recognized as “*certified*” by Check Point. To provide reliable exam results and *Test Integrity*, Check Point uses a third party that conducts online proctor certification exams using a proctoring software that monitors the computer's desktop, webcam video, and audio. Upon successfully passing the exam, candidates will receive an official Check Point certification. As mentioned previously, *SecureAcademy*™ instructors will receive 100% discount vouchers towards taking their exams, while *SecureAcademy*™ students will receive 85% discount vouchers

How do I contact the SecureAcademy team?

In order to contact the SecureAcademy team feel free to reach out at any time to secureacademy@checkpoint.com or to leave us a message on the website.
