# CHECK POINT™

Managed Firewall
Solution Brief

Managed Firewall

Our global Managed Services teams provide Managed Firewall Services with an exceptional level of support and security for your network security footprint.

We provide specialized expertise in managing NGFWs such as Check Point Quantum, Maestro, CloudGuard and other third-party firewall solutions.

Our comprehensive Managed Services scope covers all aspects of NGFW support including 24x7 Realtime Telemetry Monitoring, Policy Management, Design, Changes, Tunning, Troubleshooting, Software Patching, OS Upgrades.

Additionally we integrate with existing IT and Infosec operations teams for Incident Handling and Advanced Product Support.

SASE — Hyper-Scale — IOT — Unified Management — Branch & SMB — Perimeter — Datacenter

Powered by 60+ Threat Prevention engines

Managed Firewall Benefits

Delivery

Our managed services team will work with you through workshops to implement and manage firewalls of all sizes, ranging from small businesses to large enterprise systems.

Our firewall management services are designed to provide a complete set of tools and processes to protect customer networks from cyber threats, malicious activity, and unauthorized access.

Optimized NGFW Performance

Focus on appliance health, performance, patching and upgrades while also providing incident handling, advanced product support, NGFW and advanced threat protection policy management, exclusions and tuning.

Comprehensive threat prevention for the network

Fully integrated, comprehensive Threat Prevention to combat these emerging physical and virtual network security threats while reducing complexities and increasing operational efficiencies.

Cost-effective

Organizations can reduce costs associated with traditional security solutions, such as maintaining and upgrading hardware and software.

Optimized central NGFW management

Optimizations for existing central management servers or platforms such as Check Point Secure Management Server, Smart-1, Smart-1 Cloud, MDS and other third party solutions.
