

Protecting the Unique Needs of Large Companies with Mission-Critical Networks

Large companies have unique support needs when it comes to managing their Check Point products. These companies connect and protect people around the world, create brand new industries and products, and influence the global economy. As they innovate and grow, so must their security architecture.

Diamond Services partners with your enterprise's IT staff, creating an expert support team committed to maximizing the value and performance of your Check Point security. This includes 24/7/365 comprehensive support and proactive consulting to minimize the security risks your company faces. Your designated Diamond Services engineer delivers advanced technical account management with extended availability and assigned on-site days. Use on-site days for project planning, version upgrades, installations, performance tuning, optimization, and more.

Diamond Services is an annual add-on to Direct Premium level support the freedom to authorize hardware replacement units, and weekly calls to collaborate and resolve issues.

DIAMOND SERVICES BENEFITS

- Strategically plan upgrades and fixes to minimize maintenance downtime
- Increase the technical expertise of your IT staff with our training plans and best practice guidelines
- Communicate instantly with your dedicated support expert who has intimate knowledge of your security architecture, procedures and needs
- Maximize the value for all your Check Point products in one easy contract

DIAMOND SERVICES FEATURES

- Direct access to your technical expert via dedicated line
- Committed on-site support days plus remote service delivery.
- Expedited response and resolution for all sales and support concerns.
- Version migration planning, performance tuning, and architecture review

Dedicated Source for Your Growing Network

Diamond Services is available in multiple levels to reduce the rising Service Request (SR) volume of our target customers.

Dedicated Diamond

An expert Diamond Services Engineer supports a single customer with massive security traffic and heavy utilization – for very dynamic environments

Global Diamond

Two expert Diamond Services Engineers support global customers from two hemispheres

Diamond-1

For customers with more than \$1 million of Check Point products installed

Diamond-2

For customers with \$1 million or less of installed Check Point products

Diamond-3

For customers with up to \$500,000 of Check Point products installed

Diamond Plus Support

For the most complex network security needs, Diamond Plus adds a local Technical Account Management (TAM) resource to your Diamond Service contract

Designated Support Engineer

Your designated, experienced Diamond Services engineer develops a deep understanding of your network and business. The goal is to work closely with your IT staff to quickly resolve your urgent issues.

Enhanced Card and Communication

We prepare weekly agendas, quarterly reports, annual reviews, and customized training plans to provide numerous collaboration and development opportunities.

Fast, Efficient Processes

Your designated Diamond Services engineer will collaborate with numerous teams to create a dependable relationship focused on high-quality service to resolve your issues quickly.

Increased Expertise

Learn how to best protect your business and increase the expertise of your IT staff with our comprehensive training plan and documented Best Practice guidelines.
