CYBRARY FOR TEAMS

The Leading Platform for Future-Proof Cybersecurity Skills Development

Cybrary for Teams is the leading choice for cybersecurity skills development programs that build mission-ready teams. With a future-proof, cybersecurity-focused platform, Cybrary provides timely, expert-curated content. Labs based on real-world enterprise scenarios and skills assessments ensure your staff is prepared to succeed against evolving threats.

Our Commitment: Developing High-Performance Cybersecurity Teams

A robust skills development platform designed to scale and grow with your team.

Cybersecurity First

We're obsessed with delivering industry-leading cybersecurity-focused content, curated by experts in the field.

Depth and Breadth

Our curriculum covers the full spectrum of functional cyber-security topics, with in-depth content for staff at all levels.

Industry Frameworks

Our content maps to key industry frame-works, including NIST/NICE, MITRE ATT&CK, CIS Controls, DoD 8570 / 8040, and more.

Timeliness & Relevance

We're committed to covering new vulne-rabilities, exploits, and threat actors, so you can prepare before they impact your organization.

Leading-Edge Experiential Tools and Team Management Features

Labs that simulate enterprise scenarios for mission-readiness.

Career Paths that give staff a roadmap to success and support retention.

Assessments that help you baseline your team's skills and close gaps.

Goals and Assignments to tailor team curriculum to meet key objectives.

Reporting and Analytics on course engage-ment for granular visibility into team progress.

CYBRARY

A Comprehensive Cybersecurity Curriculum

Supporting continuous development throughout the talent lifecycle.

Career and Skills Development

In-depth content on all of the key functions in a modern, high-performance cybersecurity organization: defensive and offensive security; engineering and ops; governance, risk and compliance; and leadership.

Certification Preparation

Support for 43 industry certifications combining expert-curated on-demand online content and live instructor-led training, with rigorous practice tests to ensure exam-readiness.

Threat-Informed Content for Mission Readiness

Timely, relevant content focused on hands-on skills to protect against the latest threats.

Threat Actor Campaigns (TACs)

Profiles on key adversaries, hacker groups, and their attacks and campaigns to prepare your team to know what to look for, assess your risk, and quickly respond to potential threats.

Common Vulnerabilities and Exploits (CVEs)

Lab-focused courses that give your team hands-on experience with new vulnerabilities and exploits so they can assess your risk and quickly patch your environment.

Cybrary Select

Courses tailored for intermediate and senior staff covering the full spectrum of specialized skill sets for the industry's most advanced roles, with in-depth tactics, techniques, and procedures.

MITRE ATT&CK Training

Courses based on MITRE's trusted, industry-leading framework on adversary tactics and techniques that prioritize and map skills development to observed kill chains.
