

IntSights for Check Point

Actionable Intelligence for Perimeter Threat Defense

Intelligence is key to winning any battle. The cyber war is no different. Without cyber intelligence, security practitioners are blind to potential attacks. Hackers could be planning major cyber campaigns, discussing and sharing attack information, with the defenders none the wiser. Sensitive data and passwords can be leaked and sold, and fake domains can be registered for future phishing attacks. Attack vectors are increasing in both number and complexity.

Imagine having advanced knowledge of all of the above and enabling the deployment of defenses before attackers have the chance to get going. That is the power of combining IntSights and Check Point.

Integration Overview: How It works

IntSights and Check Point have partnered to address the inherent challenges of protecting enterprises from the early stages of the cyber kill chain focused on reconnaissance. By partnering with Check Point, IntSights has made it easy to ensure your defenses are leveraging the latest IntSights intelligence by automatically pushing tailored alerts and prioritized IOCs to your perimeter defenses to prevent future threats within seconds of detection. Setup is painless and provides your organization with granular controls to determine the types of IOCs you want applied.

- Rapidly and automatically scan the clear, deep, and dark web for organization-specific intelligence indicative of a breach or imminent attack.
- Receive real-time contextual alerts immediately upon detection.
- Instantly initiate takedowns of malicious elements.
- Integrate enriched intelligence into existing security devices to preemptively prevent impending attacks.

Integration Benefits

- Detection of external threats targeting your organization, customers, partners, and employees from clear, deep, and dark web sources
- Detailed actionable intelligence on attack strategies and techniques
- Immediate mitigation and blocking of potential threats
- Proactive and preemptive threat prevention based on IntSights curated intelligence

The IntSights Threat Intelligence Platform (TIP)

IntSights performs continuous monitoring of the clear, deep, and dark web; social media; paste sites; app stores; hacker forums, and a multitude of additional sources, searching for customer-specific data. When a threat is detected, information is collected, analyzed, and converted into actionable cyber intelligence alerts delivered to the customer in the IntSights platform.

The IntSights TIP centralizes and operationalizes threat intelligence. IOCs from numerous public and private threat feeds and sources are aggregated and visible via a single dashboard for analysis and collaboration. Relevant IOCs are enriched with tailored intelligence based on your digital footprint and ranked based on severity, enabling you to investigate, prioritize, and accelerate remediation efforts directly within the IntSights External Threat Protection Suite.

The IntSights Advantage

Proprietary Collection

Gather intelligence from the deepest and hardest-to-reach places on the web.

Tailored Intelligence

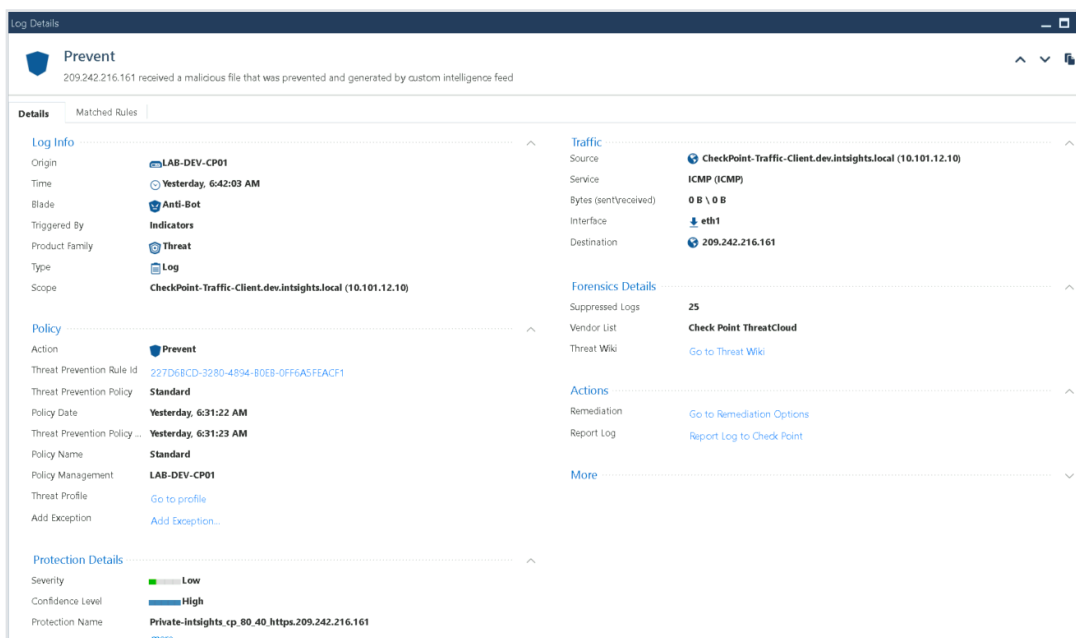

Instantly discover threats that matter most to your business by mapping intelligence to your digital assets.

Orchestrated Mitigation

Coordinate proactive response to dismantle and block threats before they cause damage.

Check Point Next Generation Firewall (NGFW)

Check Point Infinity protects your business and IT infrastructure against Gen V mega cyberattacks across all networks, endpoint, cloud, and mobile. The architecture is designed to resolve the complexities of growing connectivity and inefficient security. It provides complete threat prevention to seal security gaps; enable automatic, immediate threat intelligence sharing across all security environments; and unify security management for efficient security operations.

About IntSights

IntSights is revolutionizing cybersecurity operations with the industry's only all-in-one external threat protection platform designed to neutralize cyberattacks outside the wire. Our unique cyber reconnaissance capabilities enable continuous monitoring of an enterprise's external digital profile across the clear, deep, and dark web to identify emerging threats and orchestrate proactive response. Tailored threat intelligence that seamlessly integrates with security infrastructure for dynamic defense has made IntSights one of the fastest-growing cybersecurity companies in the world. IntSights has offices in Amsterdam, Boston, Dallas, New York, Singapore, Tel Aviv, and Tokyo. About Check Point

Check Point Software Technologies Ltd. (www.checkpoint.com) is the largest network cybersecurity vendor globally, providing industry-leading solutions and protecting customers from cyber attacks with an unmatched catch rate of malware and other types of threats. Check Point offers a complete security architecture defending enterprises – from networks to mobile devices – in addition to the most comprehensive and intuitive security management.
