

# Accelerated CCSE NGX Training

*Critical knowledge and skills on the Check Point  
NGX platform for CCSE NG professionals*

## YOUR CHALLENGE

As a Check Point certified professional, you already know the importance and value of training and certification—critical skills and knowledge that enable you to enforce maximum security and protect your business with Check Point solutions.

Check Point's latest release, the NGX platform, leverages that security even further with major enhancements to enforcement, VPN, and management capabilities to provide your organization with stronger protection and smarter management—addressing your most challenging security problems.

But you don't have the time or resources to master the NGX platform on your own, sorting through documentation or even worse, learning on the job by trial and error. As a CCSE NG professional you want a fast, cost-effective way to bridge the gap between current skills and what you need to know about the NGX platform. You need focused training, hands-on experience, and access to knowledgeable experts to give you the know-how and skills that you need to successfully implement the NGX platform.

## OUR SOLUTION

The Accelerated CCSE NGX course is an in-depth, two-day class designed to give you the critical knowledge and hands-on experience that you need to implement the NGX platform and achieve NGX certification.

Written by our training experts with first-hand experience on the NGX platform, you will gain essential information that you need to get your job done effectively—with best practices and recommended solutions not available anywhere else. NGX-platform-qualified Check Point Authorized Training Centers (ATCs) accelerate and focus the learning process, so that you can concentrate on training without distractions, ask questions, and gain from the insight of peers and colleagues. You will have the opportunity to safely try the NGX platform in a realistic environment, avoiding common, costly, and potentially serious mistakes that could compromise security and valuable assets.

Developed specifically for Check Point Certified Security Experts (CCSE) on NG with Application Intelligence, you will gain the necessary skills and experience to pass the CCSE NGX exam and earn CCSE NGX certification. Recognized throughout the industry as one of the most valuable security skill sets, Check Point certification proves that you have the ability to ensure the confidentiality, integrity, and availability of valuable business assets with the NGX platform.

## PRODUCT DESCRIPTION

Check Point's Accelerated CCSE NGX training provides the critical knowledge that you need to maximize the benefits of the Check Point NGX platform.

## PRODUCT FEATURES

- Comprehensive training on the Check Point NGX platform and technologies:
  - Upgrading from the NG release to the NGX release
  - Dynamic VPN routing
  - Check Point QoS
  - SmartDirectory
  - Additional features changed/added with the NGX release
- Two-day, accelerated, instructor-led course offered by qualified ATCs
- In-depth materials written by the experts on the NGX platform

## PRODUCT BENEFITS

- Ensure comprehensive, strong security and protect valuable business assets with the NGX release
- Maximize benefits of Check Point NGX features and technologies, which increase ROI
- Accelerate learning with cost-effective, focused training classes
- Increase productivity and efficiency, reducing total cost of ownership

# NGX™

*The NGX platform delivers a unified  
security architecture for Check Point.*

Register for an Accelerated CCSE NGX course at a qualified ATC near you at <http://www.checkpoint.com/services/education/> and get the critical skills and knowledge that you need to take advantage of the Check Point NGX release.

## ABOUT CHECK POINT SOFTWARE TECHNOLOGIES

Check Point Software Technologies ([www.checkpoint.com](http://www.checkpoint.com)) is the worldwide leader in securing the Internet. It is the confirmed market leader of both the worldwide VPN and firewall markets. Through its Next Generation product line, the company delivers a broad range of intelligent perimeter, internal, and Web security solutions that protect business communications and resources for corporate networks and applications, remote employees, branch offices, and partner extranets. The company's Zone Labs ([www.zonelabs.com](http://www.zonelabs.com)) division is one of the most trusted brands in Internet security, creating award-winning endpoint security solutions that protect millions of PCs from hackers, spyware, and data theft. Extending the power of the Check Point solution is its Open Platform for Security (OPSEC™), the industry's framework and alliance for integration and interoperability with "best-of-breed" solutions from more than 350 leading companies. Check Point solutions are sold, integrated, and serviced by a network of more than 2,300 Check Point partners in 92 countries.
