

Check Point InterSpect NGX Course Objectives

1. Determine the need for internal network security.
2. Compare and Contrast Intrusion Detection/Prevention Systems with InterSpect.
3. Distinguish among the models of InterSpect appliance.
4. Determine the recommended environments for specific models of InterSpect.
5. Troubleshoot basic hardware issues with the InterSpect appliance.
6. Set up and configure InterSpect.
7. Distinguishing among the operational modes of InterSpect.
8. Manage InterSpect.
9. Deploy InterSpect in various scenarios.
10. Identify methods of protection in SmartDefense and Web Intelligence.
11. Identify several major protocols used on the Internet.
12. Distinguish how InterSpect protects internal networks against malware and exploits associated with internet protocols.
