Course Objectives	v
Preface: Check Point Media Encryption (Pointsec Protector)	1
Course Layout	2
Prerequisites	2
Check Point Certified Specialist - Media Encryption (CPCS-Media Encryption)	2
Recommended Setup for Labs	3
Supplemental Materials	3
A Note on using VMware	3
Recommended Lab Topology	4
IP Addresses	5
Lab Terms	6
Training and Certification	7
CCMA	8
Learn More	8
Chapter 1 Pointsec Protector Overview	9
The Threats	11
About Pointsec Protector	16
Protector Requirements	17
Pointsec Protector Elements and Features	17
Pointsec Protector Architecture	21
License Handling	27

Lab 1: Pointsec Protector Server Installation	29
Server Installation.....	30
Back-up the Media ID.....	40
Importing Site IDs (optional).....	43
Export Your Site ID.....	43
Import Site IDs.....	45
Review.....	49
Review Questions.....	49
Chapter 2 Deploying Pointsec Protector	51
Pointsec Protector Server.....	53
Creating the Security Policy	59
Pointsec Protector Server Properties	59
Profiles	68
Creating User and Computer Groups	88
Default User Groups.....	89
Users with Custom Profiles.....	90
Group Properties	94
Adding Users to Groups	95
Computer Groups.....	100
Deploy Client to End-Users.....	106
Lab 2: The Administration Console	107
Create Local Users and Groups (Optional)	108
Registry Change.....	108
Create Users and Groups	110
Create the Standard Users Profile.....	113
Configuring the Device Manager	115
Configuring Removable Media Manager.....	117
Configuring the User Interface	118
Configuring Auditing Settings	119
Configuring Advanced Settings	120
Lab 3: Group Creation	121
Creating an AD Synchronized User Group	122
Creating a USB Access Group	127

Modify Group Security Settings	132
Customizing USB Access	134
Customizing the Device Manager	137
Customizing the Encryption Tab	139
Lab 4: Client Installation	143
Client Software Installation	144
Viewing Client Settings	151
Review	155
Review Questions	155
Chapter 3 Pointsec Protector Client	157
Client and Server Interaction	159
Client Registration	159
Computer Management	161
Profile Updating	163
Advanced User Management	164
Client-Side Functionality	170
Client Menu	170
Lab 5: Test User Access	179
Test USB Access Rights	180
Encrypting Removable Media	184
Lab 6: Decrypting Devices	189
Modify the Custom Profile	190
Decrypt Media Using the EPM Client	193
Lab 7: Configuring PSG	197
Create a PSG Restriction	198
Modify the Custom Profile	198
Test Client Access	201
Apply an Exempt Application	201
Test the Exemption	205
Review	207

Review Questions	207
Chapter 4 Logging, Auditing and Reporting	209
Auditing Tab Features	210
Events List	211
Removable Media Audit Rules	213
Auditing and Event Logging	219
Filtering Logs	219
Log Events	221
Log Export	224
Log Properties	225
RMM Audit Events	227
Alerts	231
Creating an Alert	231
Reports	235
Creating a Report	235
Lab 8: Logging and Reporting	245
Create a New Report	246
View a Report	252
Lab 9: Adding a Device using Device Manager	255
Select an Event	256
Open the Log Event	257
Add Device to Device Manager	259
Review	263
Review Questions	263
Appendix A Chapter Review Answers	265
Appendix B Device Manager Permissions	271
Appendix C EPM Key Recovery	273
