

Check Point On-Site Training Accelerated CCSE NGX R65

ADDRESSING THE TRAINING NEEDS OF
YOUR ORGANIZATION AND BUILDING
SKILLS FOR A SECURE FUTURE.

- 2 Days Training by a Check Point Certified Security Instructor at your location
- Check Point Courseware
- Hands-On Lab Exercises
- Preparation for Accelerated CCSE NGX R65 exam

If you are a Check Point CCSE NG or CCSE NG with Application Intelligence professional, and want a quick way to update your knowledge about Check Point NGX quickly and update your certification, the Accelerated

CCSE NGX R65 class was designed for you. Accelerated CCSE NGX R65 is intended to provide an understanding of upgrading and advanced configuration of VPN-1 NGX R65. You'll learn about VPN-1 components and Check Point's three-tier architecture works to secure your network. You will learn how to perform command-line operations using Check Point's SecurePlatform operating system; use monitoring tools to track, monitor, and account for all connections logged by Check Point components; configure network-bandwidth requirements and interpret the results; use Network Address Translation to overcome IP addressing limitations; and protect organizations from known network attacks and entire categories of emerging or unknown attacks, using SmartDefense.
