

# Check Point NG with Application Intelligence

## SecurePlatform Add-on Release Notes

### 1. Overview

This add-on includes some utilities that are considered unnecessary for many SecurePlatform customers, but are frequently required by some customers.

The package includes the following utilities –

- wget – a simple web client.
- vixie-cron – job scheduling utility.
- telnet – telnet client.
- minicom – modem control and terminal emulation program.

You can install this package on any SecurePlatform NG with Application Intelligence or higher. Once installed, we will ensure that it is maintained during future release upgrades.

In order to execute any of these utilities, you will need to use the “Expert” mode.

### 2. Installation

The package can be installed locally from SecurePlatform via the “patch” utility, or centrally via SmartUpdate

#### 2.1. Package content

- 2.1.1. The Add-On package - SecurePlatformAddOn.tgz
- 2.1.2. Windows based patch to SmartCenter to allow installation via SmartUpdate - “SplatAddonMgmtPatch.bat”
- 2.1.3. Unix based patch to SmartCenter to allow installation via SmartUpdate - “SplatAddonMgmtPatch.sh”

#### 2.2. Installation via the local “Patch” utility

- 2.2.1. Copy the file SecurePlatformAddOn.tgz to a TFTP server
- 2.2.2. Use patch command to install it, using the following command line:  
patch add tftp <server ip> SecurePlatformAddOn.tgz

# Check Point Software Technologies Ltd.

## SecurePlatform Add-on

---

### 2.3. Installation via SmartUpdate

- 2.3.1. Add the SecurePlatformAddOn.tgz package to the SmartUpdate repository:
  - 2.3.1.1. Select **Products > New Product > Import File** from the menu.
  - 2.3.1.2. In the file selection dialog box select the CPspaddon file.
- 2.3.2. Update the SmartCenter Server configuration to accommodate the add-on package:
  - 2.3.2.1. Run “SplatAddonMgmtPatch.bat” on Windows platform
  - 2.3.2.2. Run “sh SplatAddonMgmtPatch” on Solaris or Linux.
- 2.3.3. Install the package on SecurePlatform modules by selecting Products->Install from the menu.

### 3. Known Limitations

- 3.1.1. To use these utilities, you must enter “Expert” mode.
- 3.1.2. wget does not support SSL (HTTPS).
- 3.1.3. File transfer (e.g. zmodem) is not supported with the minicom package.
