

Alrov Luxury Hotels protects against cyber threats with Check Point to ensure flawless guest experience

Israeli hotels operator deploys Check Point SandBlast Agent to secure endpoints, simplify management and retain end-user flexibility

“The advantage of the Check Point solution is that it’s easily scalable. It can be deployed in our hotels in London, Paris and Amsterdam with a click of a button.”

— Moshe Revivo, CTO,
Alrov Luxury Hotels

Alrov Luxury Hotels is an Israeli hotel operator for The SET Hotels in Europe and for The Mamilla Hotel and the David Citadel Hotel in Jerusalem

Industry: Entertainment and Leisure

ALROV[®]
LuxuryHotels

Challenge

- Strengthen endpoint security, protecting guest and operational data

Solution

- Check Point Harmony Endpoint

Results

- Protects against known and unknown endpoint threats
- Reduces strain on in-house cyber security team, with centralized management
- Simplifies roll-out to international hotels within the company’s portfolio
