

# Best Friends Animal Society Leverages Serverless Architecture to Achieve Long Term Strategy and Secure Infrastructure

Best Friends is the largest nonprofit no kill animal sanctuary in the United States.

“We selected CloudGuard Dome9 for Serverless to provide additional security, as it seamlessly integrated into our ever expanding use of AWS Lambda functions, and helped automate security into our serverless infrastructure.”

- Brent Bane, Senior Cloud Architect, Best Friends Animal Society

## Challenge

- Traditional infrastructure was hindering speed of development and ability to meet strategic goals
- Needed a solution that would allow for them to quickly scale, deploy new projects, lower their operational costs, and enhance their security

## Solution

- Check Point CloudGuard Dome9 for Serverless

## Results

- Allowed seamless integration of security tools into CI/CD development pipeline
- Provided peace of mind that serverless deployments were completely secure

Industry: Nonprofit Organization
