

Belgian Teaching Hospital and Healthcare Provider Enables Secure Mobile Working with Check Point Solutions

Mobile Bring Your Own Device (BYOD) program becomes a reality at CHU Charleroi thanks to protection from Check Point SandBlast™ Mobile

“Obviously we reviewed other options, but Check Point was the only product that met our needs. SandBlast Mobile is the complete product.”

The University Hospital Center of Charleroi (CHU Charleroi) is a public hospital in the Wallonia region of Belgium

Industry: Healthcare

— Edwin Urbain, Network & Telecom Team Leader,
CHU Charleroi

Challenge

- Ensure data security while introducing over 500 corporate smartphones and tablets across the organization
- Provide the IT team with access to device apps without impacting on their device usability
- Enable the hospital to introduce BYOD policy, improving staff efficiency

Solution

- Check Point SandBlast™ Mobile

Results

- Ensures real-time visibility of mobile threats on any device, along with threat history
- Automatic approval of mobile apps simplifies device management and maximizes usability
- Improves staff efficiency without impacting security
