

Eurowind protects critical energy infrastructure from Gen V Cyber Attacks with Check Point Infinity Total Protection

“The Check Point Infinity Total Protection model covers all current threats. I don’t have to choose different vendors for specific tasks or challenges. Everything is included.”

Eurowind Energy is one of Europe’s leading developers and operators of photovoltaic (PV) and wind turbine projects.

— Kim Moberg, IT Manager,
Eurowind Energy

Challenge

- Establish a comprehensive cybersecurity infrastructure that can adapt during the periods of rapid business growth
- Prevent malicious cyber attacks from impacting the IT infrastructure
- Protect the critical energy business and industry from downtime

Solution

- Check Point Infinity Total Protection
- Check Point Harmony Mobile
- Check Point Harmony Email & Office

Results

- Consistent prevention against known and unknown threats with consolidated security architecture
- Reduced strain on in-house cybersecurity team, with centralized management, dynamic dashboard and custom-made reporting
- A simple and flexible security model that adapts to business growth
