

Gimv secures critical investment data with Check Point Harmony

Check Point solutions provide a single pane of glass from which to control cloud and on-premise security

“Harmony is a ‘set and forget’ solution. It gives end users the confidence to know that the mail in their mailbox has already passed security checks and is secure.”

— Kristof Poppe, IT Manager, Gimv

Gimv is a European investment company managing around €1.6 billion invested in more than 50 portfolio companies.

Industry: Financial

Challenge

- Secure critical data as the business develops its cloud IT strategy
- Simplify the task of managing an ever-changing threat landscape

Solution

- Check Point Harmony Email & Office
- Check Point ThreatCloud

Results

- Secured data as users move to Office365 and SharePoint Online
- Consolidated security architecture from one vendor, reducing costs and simplifying management
- Provided single pane of glass to manage distributed security environment
