MAO, Medical Advocacy and Outreach, Takes A Giant Step Forward in Security and Data Privacy

Check Point solutions deliver the most innovative and effective security including protecting endpoints, delivering deep threat visibility, and helping ensure compliance at a glance.

MAO provides educational, medical, and social services to those affected by HIV and related illnesses.

"Check Point gives me full confidence in our ability to grow and effectively maintain security and privacy. I've worked with most of the other product out here, and Check Point gives me the most peace of mind."

— Benjamin Urquhart
Division Manager of Information Technology, MAO

Challenge

- Upgrade the clinic' security posture to defend against threats and support growth
- Meet compliance requirements
- Stop malware and ransomware infections

Solution

- Check Point Harmony Endpoint
- Check Point Quantum Maestro
- Check Point R80

Results

- Prevented ransomware infections
- Ensured cyber protection and privacy of client data
- Gained at-a-glance visibility of systems' compliance status
- Improved efficiency and served more patients through secure innovative remote services
