

German Engineering Specialist Strengthens Threat Prevention and Halves Administration Time with Check Point Infinity

Check Point Infinity provides a unified approach to cybersecurity and enables Motortech to simplify management and strengthen its threat prevention

“We researched the market and found Check Point to be the best overall solution. It convinced us it had the most effective unified approach to cybersecurity.”

— Marcus Morig, Head of Information Technology, Motortech

Motortech is a specialist manufacturer of parts and accessories for stationary gas engines

Industry: Manufacturing

Challenge

- Strengthen threat prevention capabilities on the network while improving understanding of potential future cyber threats
- Improve the effectiveness and efficiency of cybersecurity by adopting a unified approach with a single solution and centralized management

Solution

- Check Point Infinity
- Check Point Security Management R80.10
- Check Point SandBlast™

Results

- Prevents cyber-attacks in their infancy
- Improves productivity of in-house security team
- Improves industry compliance with a centralized security management
