

Total network visibility with a single click

Internet service provider PÿUR Business delivers effective security for both its own networks and its customers using Check Point security solutions

“Check Point CloudGuard SaaS enabled us to not only achieve our security goals, but discover other application issues that we had not been aware of.”

— René Möller, Security Systems Engineer, PÿUR Business

PÿUR Business is a German Internet service provider specializing in Business to Business (B2B) customers.

Industry: Technology Solutions

Share this story

Challenge

- Provide network protection for both internal systems and customer sites
- Implement a central management system that provides total network visibility

Solution

- Check Point Quantum Security Gateway
- Check Point R80

Results

- Secure protection from cyber-attacks and efficient central management with full transparency of customer and internal networks
- Unified policy for easy scalability and dramatic reduction in the number of firewall rules
- Prevention of 9,600 cybersecurity attacks a month
- 60% reduction of time required to create, change and manage firewall rules
