

# Stefanini gains Cyber security management insights enhancing security posture throughout ecosystem

Check Point Next Generation Firewalls and Check Point R80 security management deliver real-time protection, visibility, and tools for improving its security posture across multiple third-party connections

“Check Point R80 was instrumental in enabling us to prevent an attack in real time. An attacker was trying to compromise a server, and Smart Log immediately gave us the information we needed to stop the attack and strengthen our defenses going forward.”

— Dion King,  
Network Engineer,  
Stefanini

## Challenge

- Defend intellectual property assets against compromise from cyber threats
- Protect client data and therefore, brand reputation
- Improve security management efficiency

## Solution

- Check Point Quantum NGFW
- Check Point R80

## Results

- Prevented attacks in real time
- Gained visibility into partner VPN connections to strengthen overall security and performance
- Improved engineer efficiency with concurrent management features and a unified console

Stefanini provides a broad portfolio of IT solutions.

**Industry: Technology Solutions**
