

Sysmex Europe improves its security infrastructure with a consolidated security approach

Check Point Next Generation Threat Prevention protects sensitive data from 5th generation cyber attacks.

“Check Point is a provider with a solution that enables me to cover a wide range of areas with one consistent interface, and modules that are all customized to complement one other.”

Sysmex Europe is a manufacturer and provider of innovative analysis devices and diagnostic laboratory services.

Industry: Manufacturing

— Michael Ritter, Director IT Network & Technical Infrastructure, Sysmex Europe

Snapshot

Challenge

- Improve functionality and performance of security systems
- Replace outdated technology and expand performance capabilities
- Change from an open configuration to a single vendor for hardware and software

Solution

- Check Point Quantum NGFW
- Check Point Quantum Security Gateway

Results

- Increased threat prevention against modern threats, improving data protection
- Secure access and sharing of data for remote workers
- Seamless transition to new Check Point products
