

TRADAIR PROTECTS CLOUD-BASED FINANCIAL TRADING PLATFORM WITH CLOUDGUARD POSTURE MANAGEMENT

Tradair makes end-to-end trading infrastructure software from price creation and dynamic distribution, to trading optimization solutions.

Industry: Financial Services

“As a financial trading services SaaS solution, CloudGuard Posture Management is an essential part of our AWS infrastructure security. The CloudGuard Posture Management platform helps us minimize attack surface, manage dynamic access and comply with ongoing compliance requirements.”

— Avi Zloof, Director of Innovation and Product

TRADAIR

Challenge

- Minimize security risks and eliminate unnecessary infrastructure exposure
- Provide firewall management, policy automation, authentication and access control
- Help in meeting compliance with international financial regulations on 3 continents such as SOX and PCI DSS

Solution

- Check Point CloudGuard Posture Management
- Check Point CloudGuard Posture Management Clarity
- Check Point CloudGuard Posture Management Compliance and Governance

Results

- Provided powerful visualization capabilities to review network topology and workflows in real-time
- Allowed administrators to mitigate risk with in-place remediation from a single platform
- Helped maintain regulatory compliance requirements and prove compliance in audits
