

Telecoms Giant Telefónica Strengthens Mobile Security with Check Point SandBlast Mobile

Check Point SandBlast Mobile Provides Intelligent Security and Strong Visible Mobile Protection for Telefónica Group, and Creates a Managed Service for Clients

Telefónica is one of the leading telecommunications companies in the world
Industry: Telecommunications

“Undoubtedly the biggest benefit has been visibility. This translates into greater confidence in the security of mobile devices, and the assurance that important corporate information is accessible, yet protected. Check Point SandBlast Mobile has very user-friendly protection.”

— Pedro Pablo Pérez, CEO, ElevenPaths

Telefónica CYBER SECURITY UNIT

Challenge

- Strengthen mobile threat prevention capabilities, closing backdoor access to the corporate network
- Integrate with in-house mobile threat cyber intelligence tool, Tacyt

Solution

- Check Point SandBlast Mobile™

Results

- Preventing threats and attacks on mobile devices
- Improves visibility of mobile threat landscape, and delivers the data to analyze and anticipate future threats
- Ensures seamless integration with in-house cyber security tool, and leading enterprise mobility management solutions
- Enables Telefónica to develop a mobile security service for clients
