

Central New Mexico Community College Improves Security Defenses While Simplifying Operations

Check Point Expands Security Capabilities and Unifies Management for Powerful, Visible, Real-time Prevention

Since its inception, Central New Mexico (CNM) Community College has delivered strong career-technical programs

“Check Point SmartEvent and SmartLog are amazing features. They give us immediate visibility into any security related events and collect data on issues that come up so we can resolve them quickly.”

— Johnny Garcia, Senior Network Administrator, Central New Mexico Community College

Challenge

- Make multiple security defenses easier to use and manage
- Keep new or unknown threats from evading the reputation-based security solutions in place
- Add more intelligence to defenses to help keep pace with evolving threats

Solution

- Check Point SandBlast Zero-Day Protection with Threat Emulation and Threat Extraction

Results

- Unified IPS, web filtering, firewall, and other advanced capabilities into a single system and one pane of glass to greatly simplify management
- Stopped zero-day threats to prevent system infections
- Gained granular control over user, application, and network resources for increased protection
