

CoxHealth dynamically scales security with Check Point Maestro hyperscale orchestrator

CoxHealth is a leading regional healthcare system in southwest Missouri.

"I can't emphasize enough how Check Point has gone above and beyond to help CoxHealth in the face of overwhelming challenges. I definitely recommend Check Point Maestro and Quantum Security Gateways to any security team. They have made our job so much easier."

- Kyle Pomeroy,
Network Engineer, CoxHealth

Sign up for updates

Challenges

- Secure high traffic levels generated by COVID work-from-home requirements
- Reduce the risk of security threats disrupting patient care operations
- Increase adaptability to cope with unpredictable change

Solutions

- Check Point Quantum Security Gateways
- Check Point Quantum Maestro Hyperscale Orchestrator
- Check Point R80 Security Management

Benefits

- Gained highly scalable, resilient security capacity when and where needed
- Eliminated risk of network failures due to insufficient firewall capacity
- Simplified security management for all network team members
