

Daymark Solutions Secures Its Microsoft Azure Cloud

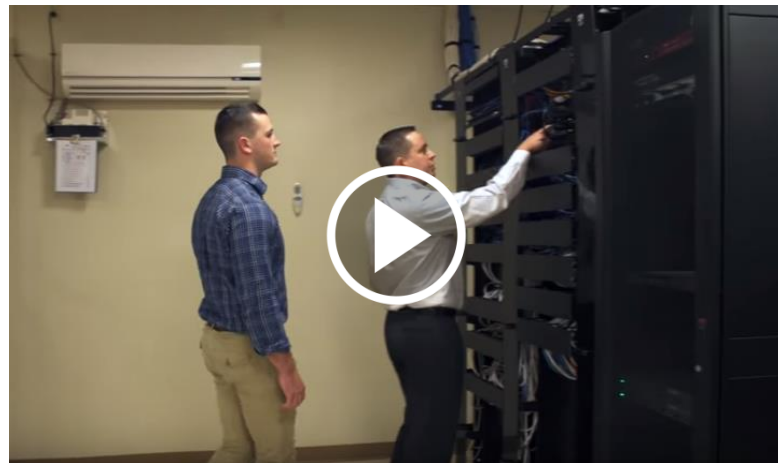

Check Point vSEC Protects Customer Assets on Premises and in the Azure Cloud

“Leveraging Check Point vSEC both on premise and in Microsoft Azure gave us a 100 percent increase in visibility into the threats that were impacting our environment. Check Point was able not only to prevent threats, but also detect and alert us every time they occurred.”

–Corey Roberts
Director of Technology
Daymark Solutions

Daymark Solutions designs and implements data center infrastructure, data protection, cloud services and managed services.
Industry: HighTech

Challenge

- Prevent cyber threats, malware and ransomware from penetrating the hybrid cloud environment
- Deploy a powerful next-generation firewall with advanced threat prevention capabilities
- Gain deeper visibility into threats and firewall activity inside the cloud

Solution

- Check Point vSEC for Microsoft Azure Cloud and Check Point security appliances

Results

- Prevented advanced threats from impacting on-premise and cloud environments
- Easy provisioning of the vSEC gateway using automation and orchestration features
- Consolidated view of on-premise and cloud security in a single pane of glass
