

# East Coast Migrant Head Start Helps Secure Children's Futures with Check Point

"Before Check Point, the team spent much of their time reacting to phishing attacks. With this constant stream of attacks now blocked by Check Point firewalls, the team can now work proactively to roll out more security features."

— Lincoln Nguyen, Technology Solutions Specialist, East Coast Migrant Head Start Project

## Challenge

- Protect patient Personally Identifiable Information (PII)
- Prevent phishing, virus and malware attacks on both fixed and mobile endpoints
- Improve productivity of IT resources

## Solution

- Check Point Harmony Mobile
- Check Point R80
- Check Point Quantum NGFW

## Results

- Gained comprehensive security for their entire network against Gen V cyber threats
- Prevented phishing and malware across all endpoints
- Improved IT efficiency through improved visibility and security management
