

Laurenty Unifies Security to Comply with General Data Protection Regulation (GDPR)

Belgian Company Chose Check Point Infinity Architecture to Unify Its Security Infrastructure and Achieve Compliance with the Highest Security Standards

Laurenty is a family group specializing in cleaning, road sweeping, building and green spaces.

Industry: Professional Services

“We are really pleased with the unified approach to security provided by Check Point Infinity. All of our security platforms communicate and share data with each other, which means that rather than just relying on detection, we know that we are actively preventing problems from occurring. This gives us confidence that our corporate and customer data is secure and that we are GDPR compliant.”

–Laurent Grutman
CIO
Laurenty

Challenge

- Create a unified security standard across networks and endpoints
- Achieve compliance with the European General Data Protection Regulation (GDPR) laws, which will come into force during 2018

Solution

- Check Point Security Gateway with SandBlast Zero-Day Protection
- Check Point Endpoint Complete Protection Suite including Check Point SandBlast Agent
- Check Point Security Management R80.10

Results

- Real-time prevention from known and unknown threats for the network and the end users
- Consolidated security management with an efficient security process
- Strict compliance with General Data Protection Regulation (GDPR)
