

# Low Cost Airline Takes Cloud Security to New Heights with Check Point

Airline Grounds Cyber Threats with CloudGuard Advanced Security

“We have so much flexibility. I can tailor policies per NSX cluster for granular control... And it’s fast - we edited and pushed multiple policies to 56 firewalls in less than eight minutes.”

— Senior Analyst, Low Cost Airline

American low cost airline that operates scheduled and charter flights

Share this story

## Challenge

- Secure a virtual desktop infrastructure environment across 120 locations
- Tailor security policies to micro-segments of the network
- Ensure consistent security provisioning, workflow, and protection across all airports

## Solution

- Check Point CloudGuard IaaS
- Check Point SandBlast Zero-Day Protection
- Check Point R80.10 Security Management

## Results

- Extended robust, consistent threat prevention security to protect east-west traffic in virtual data center environment
- Stopped ransomware that took down a major courier services delivery company
- Simplified and increased management efficiency with concurrent administration capability
