

# Mississippi Secretary of State's Office Secures Mobile Devices, Gaining Peace of Mind and Significant Savings

Check Point SandBlast Mobile Prevents Advanced Attacks on Mobile Devices

Mississippi Secretary of State's Office

“SandBlast Mobile gives us so much more protection with so much less management effort. Instead of taking up to 30 minutes to install on a device, it now takes two or three minutes, and we get consistent protection across Android and iOS platforms.”

— Russell Walker, Chief Technology Officer,  
Mississippi Secretary of State's Office

## Challenge

- Provide enterprise-grade protection for Android and iOS mobile devices and users
- Make security transparent to mobile users
- Simplify management

## Solution

- Check Point SandBlast Mobile

## Results

- Prevented known and unknown malware from infecting mobile devices
- Reduced installation time per device from 30 minutes to 3 minutes
- Regained hours of productivity through effortless management, achieving a 50% cost savings over the previous solution
