

# Futureproofing with Endpoint Security and Quantum

“We need a dynamic partner who can offer flexibility and handle all the latest threat scenarios. Thanks to the Check Point solutions that we have in place today, we can now do this.”

— Marcus Morig, Head of IT, MOTORTECH

MOTORTECH is an international specialist manufacturer of components and accessories for the gas engine industry.

Share this story

## Challenges

- Obtain complete protection and prevention of the latest unknown threats
- Enhance security to combat the latest cyber threats, both known and unknown

## Solution

- Check Point Harmony Endpoint
- Check Point Quantum Security Gateway

## Results

- Data is protected from encryption, deletion and compression
- Harmony Endpoint enables full visibility & detailed coverage and provides a considerable security advantage as it allows adaptation to individual needs
- A significant reduction in workload
