

Omnyway uses CloudGuard Dome9 to provide secure devops for its retail mobile

“Speed is a key benefit in secure DevOps, but teams often think that there’s a tradeoff between speed and security. That’s not always the case. With CloudGuard Dome9’s Dynamic Access Leases, we were able to provide just-in-time access for our DevOps teams to allow for rapid yet secure access which was a major enabler for our IT operations.”

— Robert Berger,
CTO & SVP Engineering
Omnyway

Omnyway is a born-in-the-cloud advanced mobile shopping and payment platform that provides retailers with the ability to offer their customers a complete digital shopping experience with the use of their smartphone for all aspects of their buying journey.

Challenge

- Visibility into the security infrastructure at scale to better secure their AWS environment.
- Provide flexible access to ports for their developers and yet maintain maximum security
- Automate scanning of its environment that provided continuous compliance reporting along with security best practices.

Solution
