## Challenge

- Protect intellectual property and prevent loss of sensitive customer data
- Protect the entire organization against advances and zero-day threats
- Reduce time invested in security management and auditing

## Solution

- Check Point SandBlast Zero-Day Protection
- Check Point Infinity R80.10
- Check Point Data Loss Prevention (DLP)
- Check Point consolidated Security Management version R80.10

## Results

- Prevent advanced threats and zero-day threats in real time
- Prevent data leakage of sensitive information and intellectual property
- Better visibility of all incoming and outgoing traffic
- Operational efficiency with 4-6 hours’ work per week saved in security management and security audits
