

Samsung Research America Secures Intellectual Property from Advanced Mobile Threats

Mobile Workforce Protected with Multi-Vector Security from Check Point

“Check Point SandBlast Mobile is the best zero-day malware protection possible for mobile devices. There’s nothing else out there with multiple layers of protection. Our IP is secure, and that’s peace of mind.”

–Steven Lentz, CISSP, CIPP/US
Director Information Security
Samsung Research America

Samsung Research America researches and builds innovative electronics for consumers and businesses worldwide.
Industry: HighTech

Challenge

- Prevent compromised devices from accessing the network or enterprise data
- Defend clean devices on the network
- Protect both iOS and Android mobile devices with single solution

Solution

- SandBlast Mobile
- Integration with VMware AirWatch
- Integration with Splunk SIEM

Results

- Gained 100% protection for iOS and Android devices
- Achieved high user adoption
- Simplified management and free IT resources
