

SE2 Insures Itself Against Advanced Threats

Proactive Protection for Clients' Sensitive Financial Data and Simplified Security Management with Check Point SandBlast

SE2 is a third party administration services provider to major insurance carriers around the globe.

Industry: Insurance

“CPU-level inspection makes SandBlast even more attractive. It prevents exploits, and the sandboxing process is fast. Speed, simplicity and ease of use mean a lot to us.”

–Saul Schwartz
Enterprise Security Engineer
SE2

Challenge

- Protect clients' highly sensitive financial data from being leaked, exfiltrated, or held for ransom
- Proactively prevent unknown malware and zero-day threats

Solution

- Check Point SandBlast Zero-Day Protection

Results

- Prevents unknown threats and dangerous exploits from gaining access
- Increased visibility into threats with detailed reporting
- Simplified management by consolidating everything under a single pane of glass
