

SREI takes to the cloud with secure confidence

“Check Point CloudGuard is the icing on the cake. I don’t think anyone can do without access to CloudGuard in a cloud environment, however small or large their implementation might be.”

— Ritayan Banerjee, VP of IT, SREI

SREI Infrastructure Finance Ltd is a Non-Banking Financial Company (NBFC) that focuses on infrastructure financing for large projects such as roads, airports, and hospitals. It also offers financing for the equipment related to such projects. Headquartered in Kolkata, it has 2,000 employees and 90 locations across India.

Challenges

- When it moved to the cloud, SREI had to comply with stringent financial regulations on data security.
- Protect customer and other internal data held in the public cloud.
- SREI needed security solutions with the flexibility to support all deployment needs.

Solution

- Check Point CloudGuard Posture Management
- Check Point CloudGuard Network Security
- Check Point R80 Unified Security Management
- Check Point SmartMove
- Check Point SmartEvent

Benefits

- Comprehensive protections for cloud assets without sacrificing agility or efficiency.
- Ease of deployment, management and maintenance of cloud security with scalability.
- Up to three person-years of effort saved
- Third party integration times slashed from one day to 30 minutes
- TCO 50% lower than with other solutions.
