

## Starkey Hearing Technologies Amplifies Visibility into Advanced Threats

Company Extends Advanced Threat Protection to Laptops and Improves Security Posture with Check Point SandBlast Agent

Starkey Hearing Technologies is the leading developer and manufacturer of hearing aids worldwide.  
**Industry: Manufacturing**

“Since we deployed SandBlast Agent, we have not had a single advanced malware or ransomware incident in almost a year.”

–Joe Honnold  
IT Manager of Network Services  
Starkey Hearing Technologies

### Challenge

- Increase protection against zero-day threats and ransomware attacks
- Protect laptops of mobile users
- Gain better visibility into incidents without increasing management and maintenance tasks

### Solution

- Check Point SandBlast Agent with Threat Emulation and Automated Forensics

### Results

- Detected and blocked ransomware, reducing incidents to zero
- Gained full visibility into threats to minimize unknown vulnerability
- Accelerated incident review and remediation while simplifying management
- Saved significant time every week by not having to remediate ransomware attacks
