

# U.S. Regional Bank gains operational efficiency while preventing advanced attacks

Bank Secures Network and Endpoints with Check Point SandBlast Network Security and SandBlast Agent

“SandBlast Agent has definitely made overall security much better. I feel confident that Check Point is stopping the malware before it gets in.”

–Network Security Administrator,  
U. S. Regional Bank

A regional full-service bank in the United States  
**Industry: Financial Services**

## Challenge

- Reduce time spent on incident response and remediation
- Prevent unknown malicious web content and email files from entering network and endpoint
- Gain better visibility into incidents and the type and source of malware blocked

## Solution

- Check Point SandBlast Network Security
- Check Point SandBlast Agent

## Results

- Secured both the network and endpoints from malicious content
- Saved significant time previously spent on remediation with automated incident handling
- Gained full visibility into unknown threats and vulnerabilities with granular forensic reports
