

The Conseil Départemental du Val de Marne Blocks Threats in Real Time

Thanks to Check Point SandBlast Zero-Day Protection, Computers in this Public Sector Organization Are Fully Protected Against Zero-Day Attacks

The Conseil Départemental du Val de Marne manages the economic and social activity of 1.4 million inhabitants.

Industry: Government

“Thanks to the SandBlast Threat Emulation blade, we can prevent unknown threats. If an attachment is suspicious, it is immediately destroyed.”

–Mikaël Auzanneau
Networks and Security Engineer
Conseil Départemental du Val de Marne

Challenge

- Protect the organization against advanced threats and block all malware in real time
- Manage the entire environment from a single console

Solution

- Check Point SandBlast Zero-Day Protection
- Check Point R80.10

Results

- Blocking known and unknown advanced threats
- Reducing the time required to deal with malicious code by 80%
- Simultaneous and simplified access to management console for administrators
