

# Valtori Gains Hyperscale Networking and Security Performance to Ensure Business Continuity for Customers

Valtori is the public managed service provider to Finland's government

"Since the implementation, we have not had a single outage due to service delivery platform issues. Thanks to Maestro, we've saved thousands of working hours every month."

- Marko Mäki,  
Group and Service Manager for  
Network Core, Design and Security  
Services, Government ICT Centre  
Valtori

## Valtori

### Challenge

- Numerous service delivery platform outages
- Network and security capacity was limited
- Customers' diverse environments made management complex

### Solutions

- Check Point Maestro Hyperscale Orchestrator
- Check Point Quantum Security Gateways
- Check Point Security Management

### Benefits

- Went from numerous service outages to zero
- Gained ability to increase capacity on demand
- Simplified management of cloud, premises, and hybrid customer environments
