

Continuous Compliance and Risk Exposure Monitoring

Complete Security and Compliance Coverage

- Leverage a complete view of your security across all IT infrastructure, cloud providers, SaaS applications, and on-premise tools
- Quickly implement and integrate the platform into your existing setup with easy-to-use and smart turnkey integrations
- Get ongoing, in-depth visibility, customized reporting, and no-code workflows to refine monitoring
- Gain centralized visibility into firewall rules, identify risks, and streamline remediation, ensuring real-time protection and audit readiness

Modernizing Cyber Governance: The Case for Automation

Navigating today's cybersecurity Governance, Risk, and Compliance (GRC) landscape is cumbersome and tedious. Due to the ever-increasing complexity of IT networks and infrastructures, implementing and monitoring multiple IT Security frameworks across multiple business units and geographies has become impossible to do manually.

Security teams in leading enterprises worldwide are looking to automate and simplify security governance processes. Monitoring and managing cyber risks across the organization effectively, including control implementation, is a critical area for modernization.

The lack of visibility, human-based error-prone data analysis, and the repetitive nature of risk & compliance monitoring all amount to a top-priority concern ready to be solved by innovative technology.

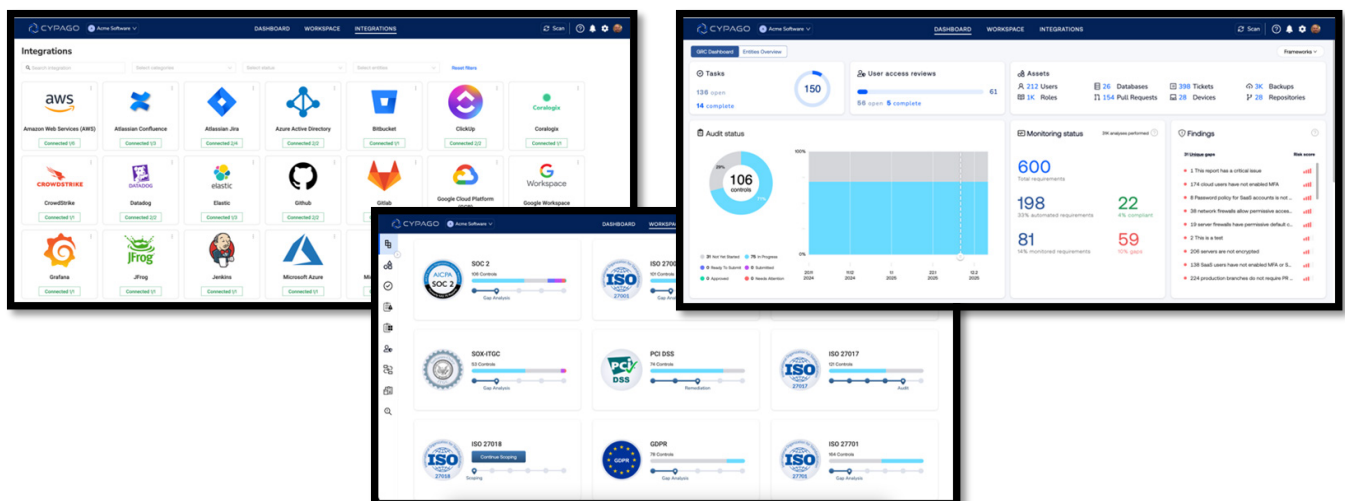

Enhanced Security: Cross- Vendor Visibility & Continuous Monitoring

Through the partnership between Check Point and Cypago, security teams can continuously monitor

and govern network security across all firewall vendors, including both cloud-based and on-prem solutions. Cypago's vendor-agnostic approach provides organizations with complete visibility and automation, reducing manual effort and human errors while strengthening overall security posture.

By complementing Check Point's robust security suite with continuous monitoring and cross-vendor oversight, Cypago enables enterprises to streamline security operations, proactively manage risks, and ensure compliance across their entire IT ecosystem.

CHALLENGE	SOLUTION
Network Security Compliance Monitoring	<p>Managing security policies and compliance across firewalls is complex and error-prone.</p> <p>Cypago extends Check Point's security suite with automated, vendor-agnostic compliance monitoring, ensuring full visibility across all network security layers, including cloud and on-prem firewalls.</p>
SaaS and Endpoint Compliance Monitoring	<p>Security teams struggle to enforce compliance across SaaS applications and endpoints.</p> <p>Cypago integrates with Check Point's solutions to continuously monitor and validate compliance across SaaS platforms and endpoints, reducing risk and ensuring adherence to security policies.</p>
Development Security Compliance Monitoring	<p>DevOps environments introduce security risks due to rapid changes and misconfigurations.</p> <p>Cypago enhances Check Point's capabilities by automating compliance checks for development environments, ensuring security policies are enforced across CI/CD pipelines and cloud-native applications.</p>

About Check Point Software Technologies Ltd

Check Point Software Technologies Ltd. (www.checkpoint.com) is a leading AI-powered, cloud-delivered cyber security platform provider protecting over 100,000 organizations worldwide. Check Point leverages the power of AI everywhere to enhance cyber security efficiency and accuracy through its Infinity Platform, with industry-leading catch rates enabling proactive threat anticipation and smarter, faster response times. The comprehensive platform includes cloud-delivered technologies consisting of Check Point Harmony to secure the workspace, Check Point CloudGuard to secure the cloud, Check Point Quantum to secure the network, and Check Point Infinity Core Services for collaborative security operations and services.

About Cypago

Cypago is a leading Cyber Governance automation solution. Cypago's SaaS-based solution transforms GRC initiatives such as cyber risk management, compliance adherence, and security policy governance into automated processes, enabling in-depth visibility, streamlining enforcement, and significantly reducing overall costs. The platform leverages innovative technologies, including advanced GenAI and NLP models, designed to support complex IT and regulatory environments at scale. It enables easy implementation and continuous monitoring for any security framework, both in the cloud and on-premises.
