

Empowering MSSPs with Comprehensive Management

Unified Security for Modern Security Challenges

Enhance Value Through a User-Friendly Platform and Diverse Service Offering

The Check Point Infinity Platform, AI-Powered and Cloud-Delivered provides Managed Security Service Providers (MSSPs) with unified management and a seamless experience to oversee their security operations. The platform offers a comprehensive interface for monitoring customer activity, rapidly identifying security threats, tracking attacker behaviors, and efficiently managing security incidents.

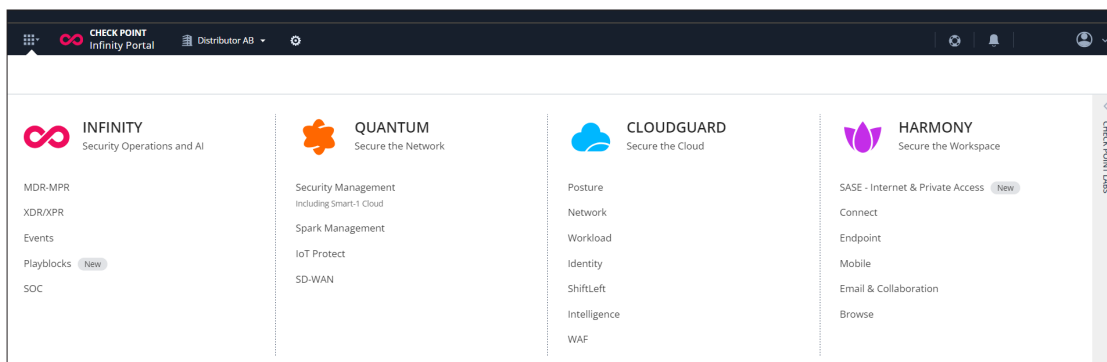

Streamlined Account Management

 **Centralized Account Management:**
Add and manage accounts, services, and contracts effortlessly.

 **Visibility and Monitoring:**
Keep track of account expirations and service statuses in one place.

 **Usage Tracking:**
Monitor daily customer usage to optimize resource allocation and service delivery.

 **Reporting Tools:**
Generate detailed reports on usage patterns for all child accounts.

With the user-friendly Infinity Platform, you can effortlessly spin up products, enabling seamless integration of email, endpoint, mobile, SASE solutions, and additional offerings into your clients' portfolios. Moreover, the platforms unified management and security operations leverage real-time shared threat intelligence to navigate the complexities of MSSP operations and to proactively prevent cyber-attacks across data centers, networks, clouds, endpoints, mobile, and IoT.

Setting the Bar for Centralized Management and Usability

MSSP-friendly centralized management, enables you to oversee all Check Point products from a single platform. Utilizing a Multi-tenant, Multi-layer Hierarchy, you can seamlessly manage multiple clients and services, optimizing resource allocation with ease.

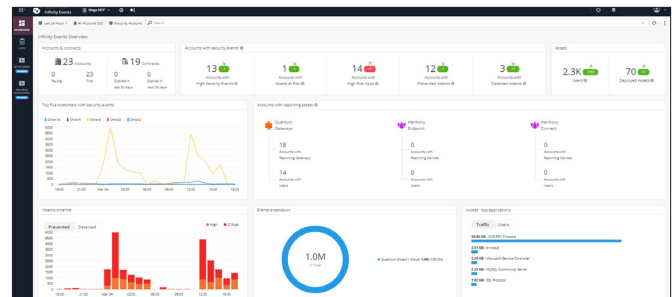

Granular Management Across the Board
