

# CHECK POINT THREATCLOUD INTELLISTORE AND MALWARE PATROL

## MALWARE THREAT PROTECTION

The information security landscape has become so complex and diversified that companies need reliable and up-to-the-minute threat intelligence data to leverage existing security strategies.

Malware Patrol, a company exclusively focused on malware and ransomware threats since 2005, partnered with Check Point to offer its Threat Protection data feed to ThreatCloud IntelliStore customers. Their team of security experts continually researches and expands its data acquisition and processing capabilities to provide world-class threat intelligence that keeps enterprises safe from cyber attacks.

## JOINT SOLUTION

Check Point and Malware Patrol joined forces to provide malware protection to ThreatCloud IntelliStore customers. Malware Patrol's Threat Protection data feed empowers organizations around the world to stay safer from cyber-attacks and data exfiltration activities.

The Malware Patrol intelligence feed is a dependable security layer that prevents malware and ransomware infections, transmission of compromised data and communications with botnets and C&Cs. It is continually updated and contains URLs, IP addresses, hashes and domain names actively involved in cyber-attacks.

The ThreatCloud IntelliStore platform seamlessly converts threat intelligence data from Malware Patrol into proactive protection, leveraging customers' existing security architecture and investment in network infrastructure.

## HIGHLIGHTS

- Focus on Malware and Ransomware intelligence
- Dependable intelligence for your layered security strategy
- Prevents infections, transmission of compromised data, communications with botnets and C&Cs
- Highly accurate threat data
- Constantly updated feed
- Protecting customers in more than 130 countries
- Online since 2005
- Leverages existing network security architecture

## ABOUT CHECK POINT

Check Point Software Technologies Ltd., the worldwide leader in securing the Internet, provides customers with uncompromised protection against all types of threats. Check Point first pioneered the industry with FireWall-1 and its patented stateful inspection technology. Today, Check Point continues to develop new innovations based on the Software Blade Architecture. The Software Blade Architecture provides flexible simple, and easy to deploy security modules that enable customers to select the security they need to build a custom Check Point security gateway solution. More information is available at [www.checkpoint.com](http://www.checkpoint.com).

## ABOUT MALWARE PATROL

Malware Patrol was founded in 2005 when the company owner saw a very real need to collect, analyze and monitor malware related data in order to protect businesses and individuals. The company has grown quickly and now employs a team of security experts that protect customers in more than 130 countries.

Systems are deployed on cloud servers in multiple geographical locations to consistently provide up-to-date threat intelligence data. Exclusively focused on malware and ransomware, the company continually researches and expands its data acquisition and processing capabilities.
