

CHECK POINT + PASSLOGY STRONG USER ACCESS

Benefits

- Prevent unauthorized access, while allowing remote user access
- Cost effective compared to current token systems by up to 80%
- Free from authentication devices
- Strong track record in the Japanese security market
- Perfect match for remote access services from smart devices

INSIGHTS

Today we live in a world where we are always connected, from any device, everywhere we go. With the proliferation of connected devices, the boundaries of the enterprise domain now extend beyond the corporate infrastructure. As a result of this surge in mobility, IT managers and security executives face enormous challenges to effectively secure access to company resources and Internet applications.

SECURE MOBILE ACCESS

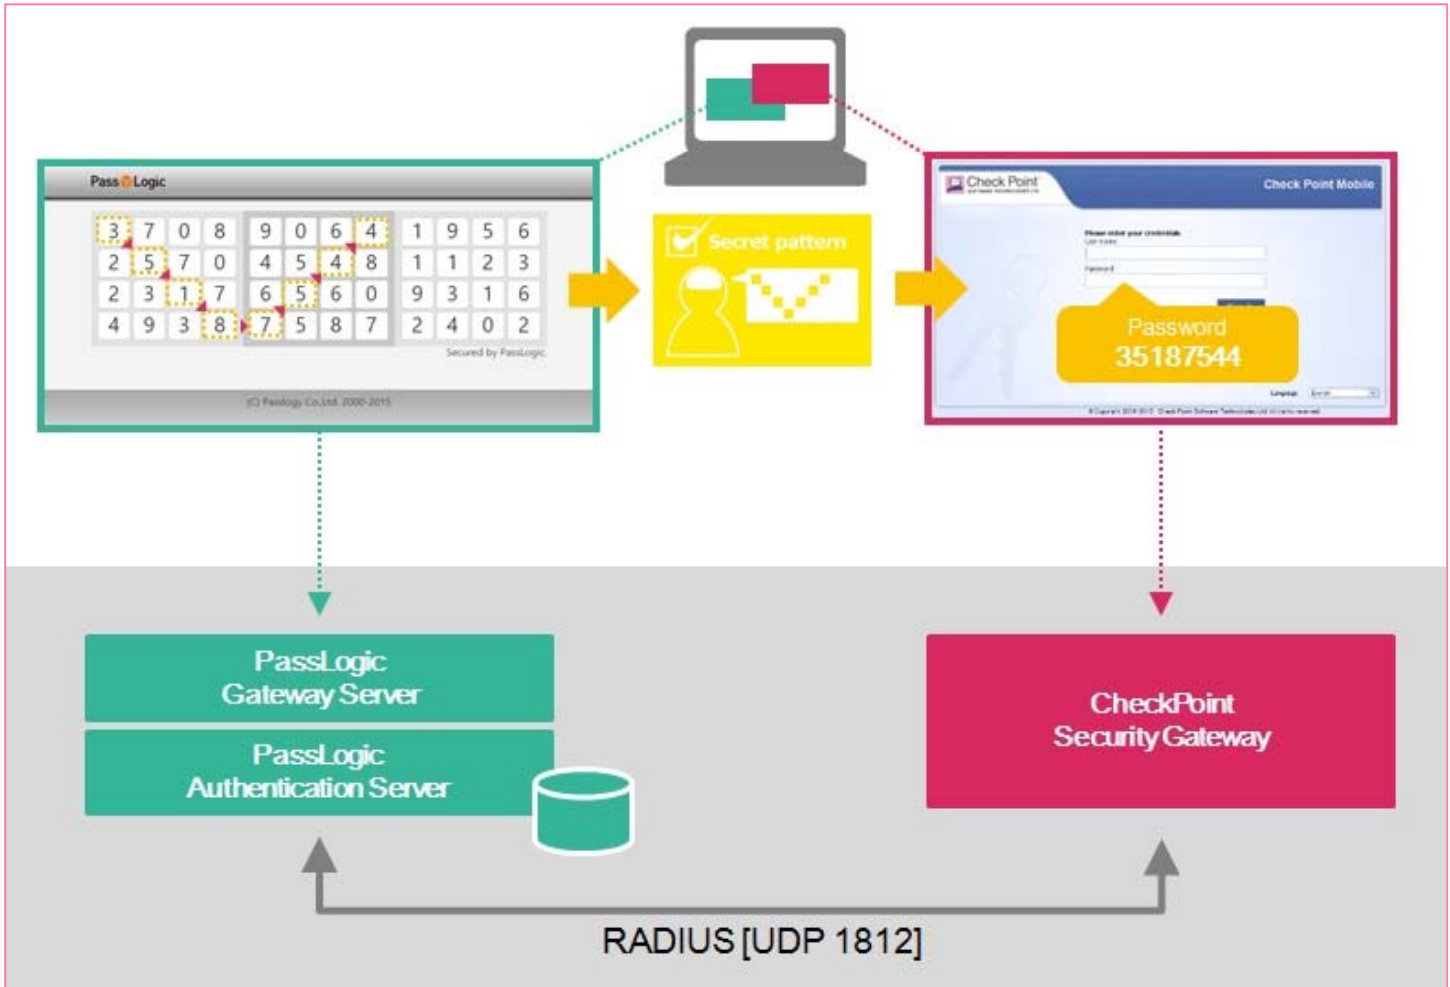

Check Point Mobile Access Software Blade is the safe and easy solution to connect to corporate applications over the internet with your smartphone, tablet or PC. The solution provides enterprise-grade remote access via both Layer-3 VPN and SSL VPN, allowing you simple, safe and secure connectivity to your email, calendar, contacts and corporate applications.

STRONG USER AUTHENTICATION

Passlogy provides corporations with a cost effective and flexible password authentication software that can manage the identification and verification of local and remote users. Passlogy's token-less and one-time password can maximize scalability, flexibility, security and cost effectiveness of authentication systems on SSL-VPN remote access solutions.

JOINT SOLUTION

Together Check Point Mobile Access and Passlogy provide strong and secure remote access to company resources and Internet applications. Users connect securely to a Check Point gateway which has the Mobile Access Software Blade enabled. PassLogic, a leading product of token-less and one-time password solutions in the security market, integrates with Check Point using RADIUS for authentication. Using the standard authentication protocol makes deployment simpler and decreases integration risks. The token-less and one-time password provides a highly secure and cost effective personal authentication system. The product meets requirements for enterprises and organizations that need to put another authentication factor on their remote access infrastructure using Check Point's SSL VPN solution. Moreover, the combination of Check Point's Next Generation Security and Passlogy's web-based authentication method maximizes the benefits of remote access from any smart device.

ABOUT CHECK POINT

Check Point Software Technologies Ltd. (www.checkpoint.com), is the largest pure-play security vendor globally, provides industry-leading solutions, and protects customers from cyberattacks with an unmatched catch rate of malware and other types of attacks.
