Prevent Known and Zero-day Threats
Check Point SandBlast Network is an evasion-resistant sandbox that provides zero-day protection from advanced and unknown threats. SandBlast Threat Extraction (CDR) ensures quick delivery of safe email and web content to users.

Flexible I/O Options
The 6800 Turbo configuration includes 10 on-board 1 GbE copper ports and one 4x 10 Gb SFP+ interface card. Or add additional I/O as you like in the two expansion slots; 8x 1GbE copper, 4x 1GbE fiber or 4x 10GbE SFP+.

Software and Support Bundles
Check Point security gateways come in three cost-effective bundles that include subscription and support. Purchase NGFW, NGTP or NGTX (sandboxing) with either direct or collaborative premium support for 1, 3 or 5 years.

Remote Management and Monitoring
A Lights-Out Management (LOM) card provides out-of-band management to remotely diagnose, start, restart and manage the appliance from a remote location. Also use LOM for remote installs of the GAiA OS.
