

CHECK POINT + ODYSSEY

UNLOCK SECURITY DATA INTELLIGENCE

UNLOCK SECURITY DATA INTELLIGENCE

A Tightly Integrated Threat Prevention Ecosystem

Solution Benefits

- Prevent threats across network, cloud, mobile and endpoint
- Unifying operations and security data makes analytics and compliance easy
- Gain real-time visibility of your security posture
- Cloud-based products and services to minimize your digital risk

INSIGHTS

Visibility is key to securing any organization. Security technologies protecting networks, cloud, mobile and endpoint devices are a rich source of data and work best when a threat is known. When identified, threat analysis enables remediation and prevention when data from that analysis becomes IoCs (Indicators of Compromise) and enriches your security defenses. When security and SIEM (Security Information and Event Management) technologies are tightly integrated, organizations detect threats earlier, minimizing the impact of the breach on business mission-critical functions, valuable data and reputation.

CHECK POINT AND ODYSSEY SOLUTION

Together, Check Point and Odyssey deliver a unique integration that leverages the rich offering of the Check Point security product portfolio and Odyssey's ClearSkies™ Threat & Vulnerability management platform. Stated simply, Check Point Next Generation Threat Prevention technologies and Odyssey ClearSkies™ Cloud SIEM provides actionable information to streamline your threat management process, reducing the time it takes to identify and respond to real threats.

Check Point security management consolidates threat visibility across your entire security infrastructure. The single management centrally correlates all types of events across all network environments, cloud services and mobile infrastructures. When a Check Point device detects a security threat, log and event data are sent to Odyssey's ClearSkies™ Cloud SIEM, to be further analyzed, enriched, and prioritized in order to provide clear insight into the organization's security posture at any given time.

INTEGRATED THREAT PREVENTION ECOSYSTEM

Check Point offers a fully consolidated cyber security architecture to protect your business and IT infrastructure against sophisticated cyber-attacks across networks, endpoint, cloud and mobile. Our prevention technologies stop both known and unknown zero-day attacks across all areas of the IT infrastructure, including cloud, endpoint and mobile. And if an attacker does penetrate the perimeter, we terminate command and control channels and break the cyber-attack kill chain before they can extract data. Check Point network, endpoint, cloud and mobile device log and event's data empowers Odyssey's ClearSkies Cloud SIEM analysis capabilities — identifying real threats.

SECURE YOUR EVERYTHING™

UNRAVEL REAL-TIME VISIBILITY

Your data has a story to tell. Discover patterns of suspicious and malicious behaviors hidden inside your network and systems.

The increasing complexity of and dependency on the IT ecosystem gives rise to previously unknown digital risks as well as new kinds of threats. The need to build security and resilience into your SecOps from the ground up has never been greater. ClearSkies™ Threat & Vulnerability management platform ClearSkies™ unlocks the intelligence of organizations Log & Event Data to accelerate the identification and response to destructive threats by associating threats with vulnerabilities. ClearSkies™ offers a fast, robust, flexible, scalable and cost-effective cloud-based line of services and products that delivers real-time visibility of your security posture.

ClearSkies™ Cloud SIEM provides real-time in-depth intelligent analysis and correlation of log and event data collected from Check Point and other heterogeneous data sources combined with evidence-based knowledge of emerging threats and vulnerabilities to produce actionable information. It streamlines your threat management process by significantly accelerating your proactive threat detection and response capabilities, thus drastically reducing your "Detection Deficit" (time between breach and discovery). At the same time, it safeguards the Confidentiality, Integrity and Availability of sensitive information found within log and event data.

ABOUT CHECK POINT

Check Point Software Technologies Ltd. (www.checkpoint.com) is a leading provider of cyber security solutions to governments and corporate enterprises globally. Its solutions protect customers from cyber-attacks with an industry leading catch rate of malware, ransomware and other types of attacks. Check Point offers a multilevel security architecture that defends enterprises' cloud, network and mobile device held information, plus the most comprehensive and intuitive one point of control security management system. Check Point protects over 100,000 organizations of all sizes.

ABOUT ODYSSEY

Odyssey, a leader in Cloud & Information Security, empowers organizations around the world to securely conduct their business in a dynamically expanding and increasingly perilous information-threat landscape. Odyssey's 360° approach encompasses a complete range of Advisory Services comprised of ClearSkies Cloud SIEM, Managed Security Services (MSS), Governance, Risk & Compliance (GRC), IthacaLabs™, Integrated Solutions and Cloud Transformation. Among the company's homegrown products is the award-winning ClearSkies™ Cloud SIEM, which is included in 2021 Gartner Magic Quadrant for Security Information and Event Management (SIEM) due to its completeness of vision and ability to execute. Odyssey is ISO 27001, ISO 9001 and ISO 22301 certified, and accredited by the Payment Card Industry Security Standards Council (PCI SSC) as a Qualified Security Assessor (QSA). We are also honored with the globally recognized Great Place to Work® certification, the assessment methodology of which is used by "The Fortune 100 Best Companies to Work in America".
