

CHECK POINT INCIDENT RESPONSE SERVICES

FULL RANGE OF SERVICES

Benefits

- Threat experts from around the globe ready to assist 24x7x365
- Ability to integrate with your environment in real time
- Gain full situational awareness on threat landscape
- Provides full forensic awareness
- Rapid recovery from attacks with improved security posture
- Directly integrates with security teams

Services Offered

- Attack Mitigation Services
- Table Top Exercises
- Post-Attack Analysis
- SOC and CSIRT Consulting
- Dedicated Threat Experts
- Incident Response Planning
- Malware Analysis
- System and Network Forensics
- Deep and Dark Web Monitoring
- Threat Hunting
- Threat Landscape Assessments
- Custom Investigations
- Staff Augmentation

IDENTIFY AND MITIGATE ATTACKS FASTER

The longer a breach operates on a network, the more expensive it becomes. This applies to multiple forms of attack and is the result of breach complexity as well as staff proficiency. It is not surprising, therefore, that most companies take longer than month from initial breach discovery to remediation completion.

Analysis of breach costs find that an important way to reduce them is to leverage an incident response team, but finding the people to staff such a team can also be costly, and maintaining it can be difficult.

The Check Point Incident Response Team can help. Our professionals are ready to analyze and mitigate attacks and focus on getting you back to business faster. They are available 24x7 to service customers across the globe.

REAL EXPERTISE AROUND THE WORLD

Check Point incident responders have the knowledge and experience to adapt to changing attack conditions in real-time. They tap into Check Point global research teams and work with deep and dark web intelligence sources, Community Emergency Response Teams (CERT) and law enforcement to understand the broader context of your security event.

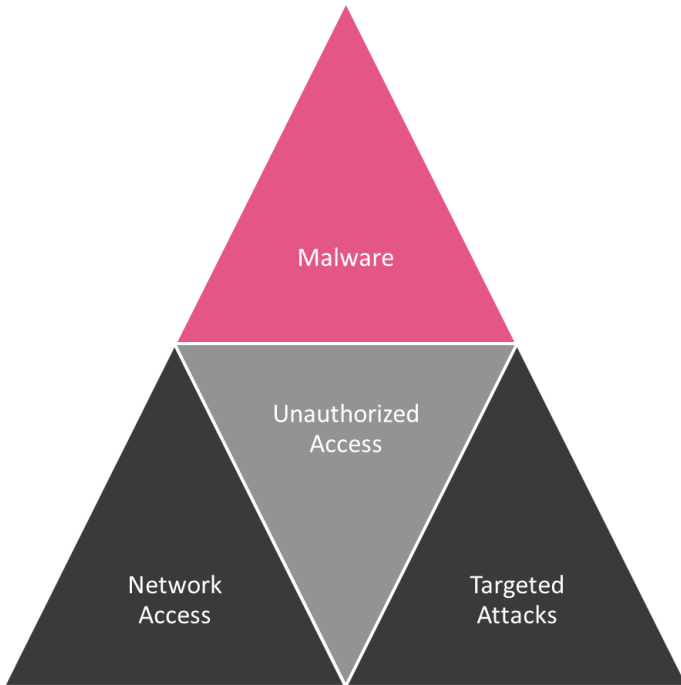

HELP INTEGRATE SECURITY LAYERS

Combine incident response with Check Point Next Generation Threat Prevention technologies to get the most out of your security architecture. We can fine-tune protections and optimize log analysis and event correlation systems so that you can focus on what is truly important to your organization.

INTEGRATED CONSULTING SERVICES

We also integrate into Check Point's broader security consulting program. Advanced CheckUp with Threat Analysis includes guidance from the Incident Response team to provide added intelligence and context information. The team also works with our Architecture colleagues to ensure that Workshop guidance is relevant to your unique requirements and threat environment.

2016 Cost of Data Breach Study: Global Analysis, Ponemon Institute, June 2016
Cleaning Up After a Breach Post-Breach Impact: A Cost Compendium," SANS Institute, December 2015, Ponemom: June 2016

MULTI-THREAT ANALYSIS

We are the only company offering insight and solutions for multiple threats including:

- Firewall
- IPS
- Applications
- Data Loss
- Malware
- Botnets
- Unauthorized Access
- Denial of Service

REAL-TIME REMEDIATION

DoS attacks and active cyber-intrusions are dynamic events. Check Point incident responders have the knowledge and experience to adapt to changing attack conditions in real-time with expert advice, thereby minimizing the exposure and damage to your computing environment.

DOCUMENTATION AND GUIDANCE

Improve processes, speed response time, and meet compliance and reporting requirements with:

- Incident response analysis and recommended remediation
- Incident response best practices guidelines
- State of preparedness report
- Annual summary of event activity
- Attack profiling

CUSTOM SECURITY CONTROLS

In addition to real-time attack remediation assistance, receive expert recommendations, including:

- Custom signatures
- Traffic and attack analysis
- Rule-based protection activations
- Custom protection development
- 3rd party systems and service providers protection how-to guides

THREATCLOUD™ INTELLIGENCE FEEDS

This real-time security intelligence database uses a worldwide network of threat sensors, constantly updating and collaborating the analysis of over 250 million addresses, 4.5 million malware signatures, and 300,000 malware-infested websites.

THE INCIDENT RESPONSE PROCESS

ADDITIONAL SERVICE OPTIONS

On-demand device installation for short-term use of security technology as preparation for upcoming events Managed Service continuously monitors IPS logs for proactive mitigation and rule timing. Security program review delivers comprehensive analysis of IT security program and technology architecture.
