CHECK POINT REMOTE ACCESS VPN

Remote work is the new norm. Efforts to slow the spread of COVID-19 accelerated the transition of employees working from home and accessing corporate resources securely through various VPN (Virtual Private Network) technologies. In a recent Gartner CFO survey [1], 74% of companies said they intend to shift employees to work from home permanently.

Check Point Remote Access VPN provides users with secure, seamless access to corporate networks and resources when working remotely. Privacy and integrity of sensitive information is ensured through strong multi-factor authentication, endpoint system compliance scanning and encryption of all transmitted data.

Simple and Secure Corporate Access from Windows and macOS

SIMPLE
Easy access for remote workers – secure connectivity for smartphones, tablets, PCs and laptops

SECURE
Communicate securely with proven encryption technology, and multi-factor authentication

UNIFIED
Deploy and manage on your existing security gateways from one unified console
SECURE REMOTE ACCESS

COMPLIANCE SCANNING
Endpoint compliance verifies the security level of the endpoint, and reports back to the Security Gateway. The gateway can allow connectivity to specific network resources, based on compliance level.

DEPLOYMENT OPTIONS
Install our endpoint VPN client in one of three options.
1. Included in Endpoint Security (Windows, macOS)
   - Firewall
   - Application Control (not available on macOS)
   - Remote Access VPN
   - Compliance
2. Standalone Check Point Mobile for Windows
   - Remote Access VPN
   - Compliance
3. Standalone SecuRemote
   - Remote Access VPN

CENTRAL MANAGEMENT
Remote Access VPN is centrally managed, enabling central policy administration, enforcement and logging from a single, user-friendly console. Centralized management offers unmatched leverage and control of security policies.

MOBILE ACCESS OPTION
The Web Portal is best for connecting securely to corporate resources from a web browser. Through an integrated web portal, users can access native corporate applications including web-based resources, shared file and email. Administrators can customize the design of the web portal to match their corporate brand identity.

SPECIFICATIONS

**Secure Access**
- Full IPsec VPN connectivity
- Compliance checks

**Authentication Support**
- Username/Password (including cached passwords)
- SecurID
- RADIUS Challenge/Response
- CAPI software and hardware tokens
- P12 certificates

**Seamless Tunnel Establishment, Teardown**
- Transparently establish a VPN tunnel upon demand
- Re-establishes connections when roaming
- Automatic tunnel tear down when on the corporate LAN

**Connect Options**
- Hotspot detection, Office Mode IP, Split Tunneling, Hub Mode, automatic fallback from NAT-T to HTTPS

REMOTE ACCESS OPTIONS

**SSL VPN Portal**
- Mobile Access Web Portal
- SSL Network Extender for Mobile Access Blade
- Check Point Mobile for iOS and Android
- Capsule Workspace for iOS and Android

**Layer 3 VPN Tunnel**
- Endpoint Security Remote Access VPN
- Check Point Mobile for Windows
- Capsule Connect for iOS and Android
- Check Point VPN Plugin for Windows 8.1
- Check Point Capsule VPN for Windows 10
