

PROFESSIONAL SERVICES

61K AND 41K SERIES TRAINING

Join our advanced three days course that will cover everything you need to implement, configure and manage daily operations of Check Point 61000/41000 appliances. In this training, participants will acquire in-depth knowledge of the 61K/41K architecture, technologies used, and the methodologies and tools to implement it. The course also includes hands-on labs.

CHECK POINT
PROFESSIONAL SERVICES
Consult • Design • Deploy • Operate • Optimize

DURING THIS COURSE YOU WILL LEARN:

- How to install and configure a 61K or 41K appliance
- How to manage a 61K or 41K Cluster
- Best Practices for new implementations and maintenance
- What tools and information sources are available to you

WHO SHOULD ATTEND

This course is designed for expert users and resellers who want to learn how to effectively deploy and manage their Check Point 61000 or 41000 Series appliances. This could include the following professionals:
