

PROFESSIONAL SERVICES Gateway HealthCheck

Check Point security gateways are the bedrock of network security, whether on the perimeter, in the cloud, at branch offices, or providing segmentation inside core networks. Use of “Next Generation” inspection and software blades is crucial when defending networks and information assets.

CHECK POINT
PROFESSIONAL SERVICES
Consult • Design • Deploy • Operate • Optimize

Boost performance and ROI of your Check Point implementations with our comprehensive HealthCheck assessments.

- Security Performance
- Software blades
- Clustering Health Check
- VSX review
- Historical performance analysis
- Routing review
- General indicators and Security Review

SOLUTION

The Gateway HealthCheck service was developed in response to customer requests and uses Check Point best practices along with decades of experience from thousands of Professional Services projects globally.

UNPARALLELED SECURITY EXPERTISE

All the checks and recommendations are derived from the combined knowledge and experience of our global group of our Professional Services consultants, applied to your environment and devices by giving you both best practice recommendations and insight into how to maximize your investment in our platform.

Our experts apply proven methodology and robust analytics to review your security devices and assess the deployed configuration correlated with current performance analytics and provide recommendations and highlight potential issues in a single easy to read report.

HOW IT WORKS

We take diagnostic information from the customer gateways (via secure upload to Check Point servers) and use internal tools to analyze the information and generate reports based on the information found.

A Professional Services Consultant reviews the reports and underlying information to make customized recommendations to the security gateway configuration.

Packages	Gateway HealthCheck	Gateway HealthCheck + Onsite
SKUs	CPTS-PRO-GW-HC-1Y	CPTS-PRO-GW-HC-ONSITE-1Y
Description	Easy to follow detailed reports of our recommendations and findings to help you fine-tune your security gateways	Full reports of our recommendations and finding, plus up to 4 days onsite support with implementing the changes to your environment
