

PROFESSIONAL SERVICES

ENDPOINT IMPLEMENTATION

You want to deploy Check Point data security solutions in an efficient, effective manner and maximize the organization-wide benefits of the implementation.

If there are tight deadlines, general uncertainty, and/or constrained internal resources, this package can help.

CHECK POINT
PROFESSIONAL SERVICES
Consult • Design • Deploy • Operate • Optimize

SERVICE BENEFITS

- Onsite Check Point Endpoint solutions expertise
- Direct access to Check Point support resources
- Timely and cost-effective deployment
- Maximize the full value of Endpoint solutions in your environment

SERVICE FEATURES

- Installation and configuration plan
- Initial implementation policy
- Knowledge transfer
- Post-implementation policy review

THE SERVICE

Check Point Endpoint Security solutions provide the highest level of data security through strong encryption for PCs, laptops, and portable storage devices. This package allows you to accelerate and ensure the success of your Check Point Endpoint Security Full Disk Encryption and/or Check Point Endpoint Security Media Encryption implementation.

With onsite assistance from a Check Point expert, you can maximize the benefits and increase the ROI of your data security implementation. Best of all, you will have the insights and experience of hundreds of successful Check Point Endpoint Security implementations, to ensure a predictable, timely, and cost-effective deployment.

The Check Point Endpoint Implementation package employs a four-phase deployment methodology: planning, configuration and testing, implementation, and fine-tuning.

Planning

During the planning stage, a Professional Services expert will discuss your environment, goals, and preferences. They will advise you on the full capabilities of Check Point Endpoint solutions and will help you tailor a deployment plan.

Configuration and Testing

In the configuration stage, the Professional Services expert will come to your site and conduct a hands-on session with your administrator team.

Knowledge Transfer

The expert will guide the administrators through installation and configuration of Check Point Endpoint solutions on several non-production systems.

Implementation

During the implementation, your Professional Services expert will guide you through a deployment within a pilot environment to ensure that the procedures your team learns can be leveraged for the entire userbase. They will also help you customize a set of deployment steps to ensure smooth implementation of your Endpoint solution.

Fine-Tuning

Once your Check Point Endpoint solution has been implemented successfully, the expert will advise you on maintenance, troubleshooting, and best practices. He/she will work with you to identify features and functionality to help maximize the full value of your Check Point Endpoint solution.
